

Outdoor CCTV Pole

Unisol Outdoor CCTV Pole can be used to provide a wide field of view for security, anti-crime, and traffic control applications in key facilities such as roadways, traffic control, beaches, and borders. Because such CCTV is exposed and positioned outside, it is subject to frequent failure as a result of changes in the external environment, requiring inspection and maintenance. This is designed to make it easier to inspect and repair cameras by installing a winch that connects counties to a wire in CCTV poles so that a camera can be moved to a lower location. As a result, the user is not required to climb to a high location where a camera pole is mounted. Unisol has expertise in design, manufacturing and mounting CCTV poles in a professional manner, and we use it to create a safe and beautiful city.

Features

- Allows security cameras and housings to be mounted on poles.
- Compatible with Analog/IP/PTZ cameras
- High Quality constructed as per outdoor applications.
- Installs quickly and easily where it's most required.
- It is durable, weatherproof, and specially built for outdoor applications.
- Removable nut and bolt system to mount on concrete foundation base plate.
