

# NANO DIN RAIL PATCH PANEL / LIU

**UNISOL** Nano Din Rail Patch Panel offers up to 6 ports for connection and is designed to be compact in order to save cabinet space. These DIN Rail LIUs can be installed in substation automation networks to give as many fiber connections as possible in the smallest amount of space. **The maximum number of cable entries that the fiber enclosure can support is two.** They are used in the oil and gas, CCTV and surveillance, rail signalling and control, process automation and control systems, renewable energy, and power transmission industries, where they can be mounted on the backplane or side panel of a compact cabinet. Various adapters, including ST, SC, FC, and LC, can be added to this fiber patch panel.

## FEATURES

- Compact size perfect for limited space enclosures
- MS/Aluminum housing with 7 tank process powder coating
- Suitable for DIN-Rail and surface mount applications
- Replaceable panel for SC/ST/LC/FC type couplers
- Allow maximum 2 cables entry
- Patch or fusion splice field termination standard
- Splice holder for pigtail splicing
- Because of its compact and ruggedly designed case it is suitable for industrial applications.
- Available with metal DIN-Rail mount for Industrial high temperature conditions and applications.
